

GARDEN OF 10.000 BRIDGES

2010, Xi'an, China

For the 2011 Xi'an International Horticulture Exhibition, West 8 designed a Master Landscape Architect Garden, that plays with the limits and the sensation of surprise.

Gardens tell a story. They combine poetry and narrative. The Garden of 10,000 Bridges represents the human life; the path of people's lifetime, which is a route of uncertainty and burden, but also of highlights and elation. The garden design takes you on this walk of life as a meandering, winding trail – continuous and like a labyrinth. It lets you find your way through nature and takes you over 10,000 bridges.

The Xi'an International Horticulture Exhibition 2011 is open until 22 October 2011.
